Grafologia e Cromoterapia - Andrea Pietro Cattaneo
- Brunilde Valenta 2017-05-25

In questo libro faremo un affascinante viaggio che

permetterà di conoscere meglio te stesso e gli altri, attraverso la correlazione della scienza grafologica e delle proprietà psicologiche e terapeutiche dei colori.

Il libro è suddiviso in tre parti: nella prima avrai modo di avvicinarti alla grafologia e capire molti aspetti della tua personalità; nella seconda potrai conoscere l'affascinante mondo del linguaggio dei colori e la loro raffinata influenza sulla psiche e sul corpo; nella terza ed ultima parte grafologia e colori sono messi in relazione, mostrandone lo stretto legame. Attraverso il test grafologico potrai rilevare quali sono i tuoi bisogni in un determinato momento, e come la conoscenza dell'influsso dei colori possa influire sul sentirti meglio e, di conseguenza, sollecitarti a scegliere il colore più congeniale per quel determinato frangente. Correlando questi due specifici linguaggi potrai capire meglio come stai e quali sono le tue esigenze e stati d'animo attraverso la grafologia e ricorrere ai colori per consolidare, migliorare o ripristinare l'equilibrio. Acupuncture - Jean-Marc Kespi 2013-02-01

Through his decades-long experience as a practitioner, Dr. Jean-Marc Kespi has returned to the ancient roots of acupuncture and developed an approach to choosing the best points for a given situation. Traditional symbolism, as reflected in the names of points and descriptions of physiological processes, can offer clues to correlating the rules of medicine and the manifestations of health or illness in the human body. Dr. Kespi's approach utilizes this theoretical base, and proceeds from symbol to a specific diagnosis and therapeutic action, and onto the insertion of a needle in a precise point on the body. In this manner he shows the practitioner how

to see beyond the symptoms and address the whole person, thereby providing more effective treatments. With keen insight into the meanings of individual points, Dr. Kespi typically uses only one to three needles to treat the disequilibrium found at the root level. In addition to laying out his ideas on the foundations of acupuncture, Dr. Kespi shares his wide experience in this book through over 100 case studies, which give the reader the opportunity to see the clinical efficacy of this method.

*Haiku for a Season / Haiku per una stagione -
Andrea Zanzotto 2012-10-29*

Andrea Zanzotto is one of the most important and

acclaimed poets of postwar Italy. This collection of ninety-one pseudo-haiku in English and Italian—written over several months during 1984 and then revised slowly over the years—confirms his commitment to experimentation throughout his life. *Haiku for a Season* represents a multilevel experiment for Zanzotto: first, to compose poetry bilingually; and second, to write in a form foreign to Western poetry. The volume traces the life of a woman from youth to adulthood, using the seasons and the varying landscape as a mirror to reflect her growth and changing attitudes and perceptions. With a lifelong interest in the intersections of nature and culture, Zanzotto displays here his usual precise and surprising sense of the living world. These never-before-published original poems in English appear alongside their Italian versions—not strict translations but parallel texts that can be read separately or in conjunction with the originals. As a

sequence of interlinked poems, Haiku for a Season reveals Zanzotto also as a master poet of minimalism. Zanzotto's recent death is a blow to world poetry, and the publication of this book, the last that he approved in manuscript, will be an event in both the United States and in Italy.

Epic Continent - Nicholas Jubber 2019-05-16

These are the stories that made Europe. Journeying from Turkey to Iceland, award-winning travel writer Nicholas Jubber takes us on a fascinating adventure through our continent's most enduring epic poems to learn how they were shaped by their times, and how they have since shaped us. The great European epics were all inspired by moments of seismic change: The Odyssey tells of the aftermath of the Trojan War, the primal conflict

from which much of European civilisation was spawned. The Song of the Nibelungen tracks the collapse of a Germanic kingdom on the edge of the Roman Empire. Both the French Song of Roland and the Serbian Kosovo Cycle emerged from devastating conflicts between Christian and Muslim powers. Beowulf, the only surviving Old English epic, and the great Icelandic Saga of Burnt Njal, respond to times of great religious struggle - the shift from paganism to Christianity. These stories have stirred passions ever since they were composed, motivating armies and revolutionaries, and they continue to do so today. Reaching back into the ancient and medieval eras in which these defining works were produced, and investigating their continuing influence today, Epic Continent explores how matters of honour, fundamentalism, fate, nationhood, sex, class and politics have preoccupied the people of Europe across the

millennia. In these tales soaked in blood and fire, Nicholas Jubber discovers how the world of gods and emperors, dragons and water-maidens, knights and princesses made our own: their deep impact on European identity, and their resonance in our turbulent times.

The Strange Case Of Dr. Jekyll And Mr. Hyde -

Robert Louis Stevenson 2022-10-19

"The Strange Case of Dr. Jekyll and Mr. Hyde"

Stevenson's famous exploration of humanity's basest capacity for evil, has become synonymous with the idea of a split personality. More than a moral tale, this dark psychological fantasy is also a product of its time, drawing on contemporary theories of class, evolution, criminality, and secret lives. Also in this volume are "The Body Snatcher," which charts the murky underside of Victorian medical practice, and "Olalla," a tale of vampirism and "The Beast Within" which features a beautiful woman at its center.

Cosmetic Acupuncture, Second Edition - Radha

Thambirajah 2015-10-21

A guide to the diagnosis and treatment of cosmetic and dermatological problems with practical instruction on how to perform treatment techniques. Thambirajah explains the energetic imbalances which cause skin diseases and the problems of early ageing, and describes how they can be treated successfully. Skin problems occur because the Blood, Qi, yin and yang of the body are not in balance and the book discusses how these can be balanced by acupuncture therapy. The therapy for a cosmetic problem has three steps: 1) to balance the body energies that cause the problem, 2) to treat the problem locally, 3) changing the diet and lifestyle of the patients with these problems. Concepts are accompanied with useful illustrations throughout, demonstrating the methods described. This second edition also contains new material on

needling and massage techniques. This is a comprehensive and authoritative textbook on the topic for practising acupuncturists and Chinese Medicine practitioners.

Lovemaps - John Money 2012-02-29

The word "lovemap" was first used by Dr. John Money in lectures at Johns Hopkins University in 1980 to symbolize "the neutral template expressed in every individual's sexueroetic fantasies and practices." The word connotes our often subconscious pattern of erotic yearnings and desire. Each of us has a distinctive lovemap, as different and individual as a fingerprint. In this book, Dr. Money outlines healthy lovemap development as well as lovemap pathology - lovemaps gone awry. Such pathology falls into three categories: hypophilia (sexual dysfunction, such as impotence), hyperphilia (erotomania), and paraphilia (perversions). Paraphilia, another term coined by

Money (from the Latin para - away from what is expected, and philia - love) can range from "those that are playful and harmless to those that are bizarre and deadly." Presenting case histories, Lovemaps describes the sexual practices of several patients and subsequent treatments of their paraphilias. Money pioneered the application of the hormone MPA, or Depo-Provera, to treat repeat sex criminals. He believes he has proved that science can prevent paraphilic sex offending, as is the case for other, physiological diseases. Lovemaps and its stirring accounts of lovemap pathology in case histories, (which are indexed under "paraphilia"), can be invaluable tools for those in the fields of sexology, child psychology, clinical psychology, criminology and, with its comprehensive glossary, the general reader - in short, anyone interested in human sexual development.

The Yellow Emperor's Classic of Internal Medicine

- 2015-12-15

The Yellow Emperor's Classic of Internal Medicine has become a landmark in the history of Chinese civilization. Written in the form of a dialogue in which the emperor seeks information from his minister Ch'I-Po on questions of health and the art of healing, it is the oldest known document in Chinese medicine. Ilza Veith's extensive introduction and monumental translation, first published in 1949, make available the historical and philosophical foundations of traditional practices that have seen a dynamic revival in China and throughout the West. A new foreword by Linda L. Barnes places the translation in its historic contexts, underlining its significance to the Western world's understanding of Chinese medical practice.

The Cosmic Hologram - Jude Currivan 2017-02-16

How holographic patterns of information underlie our physical reality • 2017 Nautilus Silver Award • Includes myriad evidence from a wide range of cutting-edge scientific discoveries showing our Universe is an interconnected hologram of information • Explains how consciousness is a major component of the cosmic hologram of information, making us both manifestations and co-creators of our reality • Reconciles Quantum Mechanics and Einstein's Theory of Relativity by showing that energy-matter and space-time are complementary expressions of information Our understanding of the Universe is about to transform at all levels, from the tiniest Planck scale to the vast reaches of space. Recent scientific discoveries show that the information that upholds all of our modern technologies is exactly the same as the universal information that underpins, pervades, and is all we

call physical reality. Exploring how information is more fundamental than energy, matter, space, or time, Jude Currivan, Ph.D., examines the latest research across many fields of study and many scales of existence to show how our Universe is in-formed and holographically manifested. She explains how the fractal in-formational patterns that guide behavior at the atomic level also guide the structure of galactic clusters in space. She demonstrates how the in-formational relationships that underlie earthquakes are the same as those that play out during human conflicts. She shows how cities grow in the same in-formational ways that galaxies evolve and how the dynamic in-formational forms that pervade ecosystems are identical to the informational structures of the Internet and our social behaviors. Demonstrating how information is physically real, the author explores how consciousness connects us to the many

interconnected layers of universal information, making us both manifestations and co-creators of the cosmic hologram of reality. She explains how Quantum Mechanics and Einstein's Theory of Relativity can at last be reconciled if we consider energy-matter and space-time as complementary expressions of information, and she explores how the cosmic hologram underlies the true origin of species and our own evolution. Concurring too with ancient spiritual wisdom, the author offers solid evidence that consciousness is not something we "have" but the fundamental nature of what we and the entire Universe are. With this understanding, we can each transform our own lives and help co-create and inform the world around us.

The Book of Prophecies - Christopher Columbus
2004-04-09

Christopher Columbus returned to Europe in the final days of 1500, ending his third voyage to the Indies not in triumph but in chains. Seeking to justify his actions and protect his rights, he began to compile biblical texts and excerpts from patristic writings and medieval theology in a manuscript known as the Book of Prophecies. This unprecedented collection was designed to support his vision of the discovery of the Indies as an important event in the process of human salvation - a first step toward the liberation of Jerusalem and the Holy Land from Muslim domination. This work is part of a twelve-volume series produced by U.C.L.A.'s Center for Medieval and Renaissance Studies which involved the collaboration of some forty scholars over the course of fourteen years. In this volume of the series, Roberto Rusconi has written a complete historical introduction to the Book of Prophecies, describing the manuscript's

history and analyzing its principal themes. His edition of the documents, the only modern one, includes a complete critical apparatus and detailed commentary, while the facing-page English translations allow Columbus's work to be appreciated by the general public and scholars alike.

Cognitive Development - David R. Olson 2013-04-15
When this book was first published, David Olson was examining the developing representation and use of diagonals in the context of much larger questions, questions also explored by Vygotsky, Cassirer, Gombrich, and Bruner. These include such issues as conceptual development, conceptual change, and stage-like transitions in one's knowledge and belief. Some of these problems remain at virtually the same stage of solution to this day. Other problems have indeed been solved or at least come closer to solution, leading the author to think about the precise cognitive representations that allowed for the cognitive growth he examined in such scrupulous detail. The author hopes that both readers and re-readers of this volume will be led to wonder -- as he did while working on the

book -- just what there is about a simple diagonal that makes its reproduction so difficult. In so doing, readers will again be reminded of the remarkable resources that children bring to bear on their understanding of the world as well as the blind spots that no simple telling can quite fill in.
