CURVES 03. Norditalien - 2017-08

TRAVEL & HOLIDAY GUIDES. Curves: Northern Italy: Lombardy, South Tyrol, Veneto portrays the most beautiful passes of Northern Italy. Starting at the Timmelsjoch, heading south to Lake Garda, and then east to the Three Peaks in South Tyrol, this book will lead you on a stunning journey through some of Northern Italy's most beautiful roadway scenescapes. Among the special highlights are the Gavia Pass, the Monte Baldo high alpine road and the Three Peaks. Stefan Bogner shot the atmospheric photos - some of them from a helicopter - to capture the full magnificence fo the landscape. In addition to full-colour photography, Curves is also a useful travel guide, offering tips for restaurants and hotels along the route.

Porsche Drive - Stefan Bogner 2015-10

After his last book Escapes, Stefan Bogner returns to the Alps again with this illustrated book. This time not only did he photograph particular routes, but he looked for the ideal tour through the Alps: 3 countries, 14 passes - the perfect little escape for 4 days. Different from Bogner's photographs in Escapes or Curves, where Bogner just presents dreamlike empty streets, Porsche Drive focuses on the journey in Porsche models such as Porsche 906, Porsche 911, Porsche 918 and more. Stefan Bogner drives his own Porsche 911 1970 ST. Apart from Bogner's photographs, Porsche Drive offers information on each route and height profile. Thus you can follow Bogner's itinerary on a long weekend. Text in English and German.

Porsche 914, 914/6, 916 - Jürgen Lewandowski 2019-04-11

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye

with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.

Newton, horticulturalist philosopher Alan Chadwick, then writer/director Marguerite Duras and writer Ray Bradbury, as well as Andy Warhol, Milos Forman, Roman Polanski, Barbet Schroeder, Roberto Rossellini shooting the last shot of his last film, and actors Pierre Clementi, Lee Marvin, Ray Milland, Nina Foch, Mae Clark, musicians Ryuichi Sakamoto, Lizzy Mercier Descloux, Jean Jacques Goldman, Chet Baker etc.

Principles of European Constitutional Law - Armin von Bogdandy 2009-12-03

For the time being, the political project of basing the European Union on a document entitled 'Constitution' has failed. The second, revised and enlarged edition of this volume retains its title nonetheless. Building on a scholarly rather than black-letter law account, it shows European constitutional law as it looks following the Treaty of Lisbon, with the EU's foundational treaties mandating the exercise of public authority, establishing a hierarchy of norms and legitimising legal acts, providing for citizenship, and granting fundamental rights. In this way the treaties shape the relations between legal orders, between public interest regulation and market economy, and between law and politics. The contributions demonstrate in detail how a constitutional approach furthers understanding of the core issues of EU law, how it offers theoretical and doctrinal insights, and how it adds critical perspective. From Reviews of the First Edition: "...should be mandatory reading for anyone who wants to get a holistic perspective of the academic debate on Europe's constitutional foundations...It is impossible to present the richness of thought contained in the 833 pages of the book in a short review." Common Market Law

Review "an enduring scholarly work, which gives an English-speaking audience important, and overdue, access to the long-standing and forever-vigorous traditions of (European) constitutional law... unhesitatingly recommend[ed]." How Technology Works - DK 2019-04-09

Have you ever asked yourself how the inventions, gadgets, and devices that surround us actually work? Discover the hidden workings of everyday technology with this graphic guide. *How Technology Works* demystifies the machinery that keeps the modern world going, from simple objects such as zip fasteners and can openers to the latest, most sophisticated devices of the information age, including smartwatches, personal digital assistants, and driverless cars. It includes inventions that have changed the course of history, like the internal combustion engine, as well as technologies that might hold the key to our future survival, including solar cells and new kinds of farming to feed a growing population. Throughout the book, step-by-step explanations are supported by simple and original graphics that take devices apart and show you how they work. The opening chapter explains principles that underpin lots of devices, from basic mechanics to electricity to digital technology. From there, devices are grouped by application--such as the home, transportation, and computing--making them easy to find and placing similar devices side by side. *How Technology Works* is perfect for anyone who didn't have training in STEM subjects at school or is simply curious about how the modern world works.

The First Beetle - Christian Grundmann 2015-03

When the discovery of this prototype of the VW 38 was posted on an internet forum, the international Beetle scene went wild. For the experienced VW restorers Traugott and Christian Grundmann there was no question: The first Splitly would become the centrepiece of their exquisite old-timer collection. The VW 38's condition may have been shocking, but it was not beyond hope. Supported by a brilliant team of

welders, upholsterers, painters, mechanics and VW enthusiasts from around the world, they managed to give the dear little Beetle a complete makeover.

Flowscapes - Steffen Nijhuis 2016-02-01

Flowscapes explores concepts, methods and techniques for design-related research on landscape infrastructures. Their main objective is to engage environmental and societal issues by means of integrative and design oriented approaches. Through focusing on interdisciplinary design-related research of landscape infrastructures they provide important clues for the development of spatial armatures that can guide urban and rural development and have cultural and civic significance. The geographical context of the papers covers Europe, Africa, Asia and Northern America.

Iron Landscapes - Felix Jeschke 2021-07-01

Throughout the 1920s and 1930s, the newly formed country of Czechoslovakia built an ambitious national rail network out of what remained of the obsolete Habsburg system. While conceived as a means of knitting together a young and ethnically diverse nation-state, these railways were by their very nature a transnational phenomenon, and as such they simultaneously articulated and embodied a distinctive Czechoslovak cosmopolitanism. Drawing on evidence ranging from government documents to newsreels to train timetables, *Iron Landscapes* gives a nuanced account of how planners and authorities balanced these two imperatives, bringing the cultural history of infrastructure into dialogue with the spatial history of Central Europe.

Postmigration - Anna Meera Gaonkar 2021-09-30

The concept of »postmigration« has recently gained importance in the context of European societies' obsession with migration and integration along with emerging new forms of exclusion and nationalisms. This book introduces ongoing debates on the developing concept of »postmigration« and how it can be applied to arts and culture. While the concept has mainly gained traction in the cultural scene in Berlin, Germany, the contributions expand the field of study by attending to cultural expressions in literature, theatre, film, and art across various European societies, such as the United Kingdom, France, Finland, Denmark, and Germany. By doing so,

the contributions highlight this concept's potential and show how it can offer new perspectives on transformations caused by migration.

Harlem's Hell Fighters - Stephen L. Harris 2003-06-30

When the United States entered World War I in 1917, thousands of African-American men volunteered to fight for a country that granted them only limited civil rights. Many from New York City joined the 15th N.Y. Infantry, a National Guard regiment later designated the 369th U.S. Infantry. Led by mostly inexperienced white and black officers, these men not only received little instruction at their training camp in South Carolina but were frequent victims of racial harassment from both civilians and their white comrades. Once in France, they initially served as laborers, all while chafing to prove their worth as American soldiers. Then they got their chance. The 369th became one of the few U.S. units that American commanding general John J. Pershing agreed to let serve under French command. Donning French uniforms and taking up French rifles, the men of the 369th fought valiantly alongside French Moroccans and held one of the widest sectors on the Western Front. The entire regiment was awarded the Croix de Guerre, the French government's highest military honor. Stephen L. Harris's accounts of the valor of a number of individual soldiers make for exciting reading, especially that of Henry Johnson, who defended himself against an entire German squad with a large knife. After reading this book, you will know why the Germans feared the black men of the 369th and why the French called them hell fighters. "

Driving Europe - Frank Schipper 2008

Today we can hardly imagine life in Europe without roads and the automobiles that move people and goods around. In fact, the vast majority of movement in Europe takes place on the road. Travelers use the car to explore parts of the continent on their holidays, and goods travel large distances to reach consumers.

Indeed, the twentieth century has deservedly been characterized as the century of the car. The situation looked very different around 1900. People crossing national borders by car encountered multiple hurdles on their way. Technically, they imported their vehicle into a neighboring country and had to pay astronomical import duties. Often they needed to pass a driving test in each country they visited. Early on, automobile and touring clubs sought to make life easier for traveling motorists. International negotiations tackled the problems arising from differing regulations. The resulting volume describes everything from the standardized traffic signs that saved human lives on the road to the Europe bus taking tourists from Stockholm to Rome in the 1950s. *Driving Europe* offers a highly original portrait of a Europe built on roads in the course of the twentieth century.

The Porsche art book - Christian Lamping 2018

Films that Work - Vinzenz Hediger 2009

Industriële films worden gezien als een apart filmgenre van de twintigste eeuw. Ze werden geproduceerd en gesponsord door de overheid en grote bedrijven en moesten vooral aan de wensen van de sponsors voldoen, en niet zo zeer aan die van de filmmakers. In de hoogtijdagen werkten er duizenden mensen aan deze industriële films. Zo zijn er vakbladen en filmfestivals ontstaan door samenwerking met grote bedrijven als Shell en AT & T. Daarnaast hebben belangrijke regisseurs, zoals Buster Keaton, John Grierson en Alain Resnais, aan deze films meegewerkt. Toch lijkt de industriële film geen spoor te hebben achtergelaten in het filmische culturele discours. *Films that Work* is het eerste boek waarin de industriële film en zijn opmerkelijke geschiedenis worden onderzocht.

DEFA at the Crossroads of East German and International Film Culture - Marc Silberman

2014-05-21

Motion picture production, distribution, exhibition and reception has always been a transnational phenomenon, yet East Germany, situated at the edge of the post-war Iron Curtain, separated by a boundary that became materialized in the Berlin Wall in 1961, resembles nothing if not an island, a protected space where film production developed under the protection of government subsidy and ideological purity. This volume proposes on the contrary that the GDR cinema was never just a monologue. Rather, its media landscape was characterized by constant dialogue, if not competition, with both the capitalist West and socialist East. These thirteen essays reshape DEFA cinema studies by exploring international networks, identifying lines of influence beyond national boundaries and

recognizing genre qualities that surpass the temporal and spatial confines. The international team of film specialists present detailed analyses of over fifty films, including fiction features, adaptations of literary classics, children's films, documentaries, and examples from genres such as music, sci-fi, Westerns and crime films. With contributions by Seán Allan, Hunter Bivens, Benita Blessing, Barton Byg, Jaimey Fisher, Sabine Hake, Nick Hodgkin, Manuel Köppen, Anke Pinkert, Larson Powell, Brad Prager, Marc Silberman, Stefan Soldovieri, and Henning Wrage.

911 LoveRS - Jürgen Lewandowski 2018-01-08
-The first comprehensive homage to the Porsche R and RS models -From the first 911 R (1967) through the varying RS models, to the latest 911 R (2016) -Includes interviews with enthusiasts, racing drivers and customers -Presents portraits of unique collectors' items and race histories - Celebrates the 50th Anniversary of the Porsche 911 R in 2017 Porsche's sporting elite - the 911 R - more performance, less weight. As the first comprehensive homage to the R and RS models, this is a must-have for all Porsche 911 lovers. At auctions they rack up premium prices, but the makers of the 911 R never intended to create objects of speculation for maximum profit. Their main concern was developing vehicles that would appeal to customers because of their uncompromising sportiness. The story begins 50 years ago, when the first Porsche 911 R achieved five new long-distance world records in Monza; and goes on to the latest 911 R - a car that is aware of its history, with racing stripes, houndstooth bucket seats, manual gear change, and a free-revving naturally aspirated engine. In between the first and the latest lie 50 years, numerous models, and a legion of fans.

Whirlwind - Barrett Tillman 2010-03-02
WHIRLWIND is the first book to tell the complete, awe-inspiring story of the Allied air war against Japan—the most important strategic bombing campaign in history. From the audacious Doolittle raid in 1942 to the atomic bombing of Hiroshima and Nagasaki in 1945, award-winning historian

Barrett Tillman recounts the saga from the perspectives of American and British aircrews who flew unprecedented missions over thousands of miles of ocean, as well as of the generals and admirals who commanded them. Whether describing the experiences of bomber crews based in China or the Marianas, fighter pilot Iwo Jima, or carrier aviators at sea, Tillman provides vivid details of the lives of the fliers and their support personnel. Whirlwind takes readers into the cockpits and gun turrets of the mighty B-29 Superfortress, the largest bomber built up to that time. Tillman dramatically re-creates the sweep of wartime emotions that crews endured on fifteen-hour missions, grappling with the extreme tedium of cramped spaces and with adrenaline spikes in flak-studded skies, knowing that a bailout would put them at the mercy of a merciless enemy or an unforgiving sea. A major character is the controversial and brilliant General Curtis LeMay, who rewrote strategic bombing tactics. His command's fire-bombing missions incinerated fully half of Tokyo and many other cities, crippling Japan's industry while still failing to force surrender. Whirlwind examines the immense logistics and construction efforts necessary to support Superfortresses in Asia and the Mariana Islands, as well as the tireless efforts of engineers to build huge air bases from scratch. It also describes the unheralded missions that American bomber crews flew from the Aleutian Islands to Japan's northernmost Kuril Islands. Never has the Japanese side of the story been so thoroughly examined. If Washington, D.C., represented a "second front" in Army-Navy rivalry, the situation in Tokyo approached a full-contact sport. Tillman's description of Japan's willfully inadequate approach to civil defense is eye-opening. Similarly, he examines the mind-set in Tokyo's war cabinet, which ignored the atomic destruction of Hiroshima and Nagasaki, requiring the emperor's personal intervention to avert a ghastly Allied invasion. Tillman shows how, despite the Allies' ultimate success, mistakes and shortsighted policies made victory more costly in lives and effort. He faults the lack of a unified command for allowing the Army Air Forces and the Navy to pursue parochial goals at the expense of the larger mission, and he questions the premature commitment of the enormously sophisticated B-29 to the most primitive theater

in India and China. Whirlwind is one of the last histories of World War II written with the contribution of men who fought in it. With unexcelled macro- and microperspectives, Whirlwind is destined to become a standard reference on the war, on multiservice operations, and on the human capacity for individual heroism and national folly.

Great Bar Food at Home - Kate Heyhoe 2007

"This is not a book about how to mix drinks. It's about what to eat after the drinks are mixed, poured, or uncapped. These recipes are stress-free, easy, and meant to be made and eaten casually. Their appeal lies in their robust flavors, serving simplicity, and the way the recipes complement beverages. They're the same type of tasty nibbles found at all the best bars--and they can look and taste just as tempting, even when made at home." --From Great Bar Food at Home

A Brief Illustrated History of Machines and

Mechanisms - Emilio Bautista Paz 2010-08-02

Machines have always gone hand-in-hand with the cultural development of mankind throughout time. A book on the history of machines is

nothing more than a specific way of bringing light to human events as a whole in order to highlight some significant milestones in the progress of knowledge by a complementary perspective into a general historical overview. This book is the result of common efforts and interests by several scholars, teachers, and students on subjects that are connected with the theory of machines and mechanisms. In fact, in this book there is a certain teaching aim in addition to a general historical view that is more addressed to the achievements by "homo faber" than to those by "homo sapiens", since the proposed history survey has been developed with an engineering approach. The brevity of the text added to the fact that the authors are probably not content to tackle historical studies with the necessary rigor, means the content of the book is inevitably incomplete, but it nevertheless attempts to fulfil three basic aims: First, it is hoped that this book may provide a stimulus to promote interest in the study of technical history within a mechanical engineering context. Few are the countries where anything significant is done in this area, which means there is a general lack of knowledge of this common cultural heritage.
