The study of the textile sector has always been central to economic history: from reconstructions of the dynamic growth in the medieval wool industry, to the rise of silk and light and mixed fabrics in the modern era, to the driving role of cotton in the industrialisation process. Although the dynamics of textile manufacturing are closely linked to the transformations of fashion, economic history has long neglected its role as a factor in economic change, treating it primarily as a kind of exogenous catalyst. This book makes a decisive contribution to the understanding of a fundamental transformation, the consequences of which are projected into contemporary society, but which matured in pre-industrial times: the advent of fashion.

House of Pain - Laurence Gonzales 2013-10-01
Laurence Gonzales began his successful publishing career in 1989 with the publication of *The Still Point* and later *The Hero's Apprentice* (1994), both with the University of Arkansas Press. From these collections of essays he went on to write for renowned magazines in addition to publishing several books, including the best selling *Deep Survival*. His journalism garnered two National Magazine Awards, and his latest nonfiction book, *Surviving Survival*, was named by Kirkus as one of the best books of 2012. This new collection of essays shows us the sometimes hair-raising, sometimes heart-wrenching writing that Gonzales has become known for. This "compelling and trustworthy guide" (Booklist) takes us from a maximum-security prison to a cancer ward, from a mental institution to the World Trade Center. Among the essays included is "Marion Prison," a National Magazine Award finalist, with its intimate view inside the most maximum security prison in America. "House of Pain" takes the reader into the life of a brain surgeon at Chicago's Cook County Hospital, a grim world that few ever see. "Rites of Spring," another National Magazine Award finalist, follows Gonzales and his wife on their journey through cancer, not once, but twice. Other stories venture above the Arctic Circle, flying deep into the Alaskan wilderness among grizzly bears and trumpeter swans; explore aerobatics in high-performance aircraft; and eulogize Memphis and Miami as American cities that mourn their fates in uniquely different ways.

Specifications for Building Conservation - Rory Cullen 2017-09-19

In *Specifications for Building Conservation*, the National Trust draws on a range of case studies and specifications to provide a much needed guide to specification writing for building conservation. Although traditional building accounts for approximately a quarter of all buildings in the UK, the old skills and understanding required for their care and maintenance have been increasingly eroded over the last century. As the largest heritage charity in Europe, the National Trust has a first class reputation for high standards of conservation and care, and in this three volume set, the Trust brings together a remarkable pool of expertise to guide conservation professionals and students through the process of successful specification writing. This first book focusses on the materials

used for the external fabric, detailing successful approaches employed by the National Trust at some of their most culturally significant sites. A range of studies have been carefully selected for their interest, diversity and practicality; showcasing projects from stonework repairs on the magnificent Grade I listed Hardwick Hall to the re-thatching of the traditional cottages of the Holnicote Estate. Complete with a practical Conservation Management Plan checklist, this book will enable practitioners to develop their skills, allowing them to make informed decisions when working on a range of project types. This is the first practical guide to specification writing for building conservation and the advice provided by the National Trust experts will be of interest to any practitioners and students involved in building conservation, both in the UK and beyond. Profits generated from the sale of this publication will go to the National Trust Building Apprenticeship Scheme. This provides placements for traditional skills at National Trust properties.
