**Renal Pharmacotherapy** - Larry K. Golightly  
2021-09-24

To promote effectiveness and minimize possible toxicity, the dosage of certain medications must be adjusted in persons with compromised kidney function. Failure to enjoin appropriate dosage adjustments in patients with abnormal or rapidly changing kidney function continues to lead to reports of drug toxicity involving a broad array of renally eliminated medications. This updated edition captures nearly 200 new drugs that have been approved by the FDA since the initial publication of *Renal Pharmacotherapy*. It also covers new evidence that has emerged regarding the need to adjust dosage of certain older medications that are eliminated by the kidneys. Additionally, it presents new data that are being continuously derived in the areas of patient-specific dose individualization for drugs of all types. Comprehensive, convenient, and evidence-based, this reference closes several identified knowledge gaps and will continue to be the leading collection of dosage recommendations for patients with compromised kidney function.

*The Art of Glass* - Victor Arwas 1996  
-- Published to coincide with a major exhibition. -  
- Examines in depth the historical background of

each designer and firm, their styles and techniques. This introduction to the most innovative period of goth century glass-making was published to coincide with The Art of Glass - Art Nouveau to Art Deco exhibition at the Sunderland Museum and Art Gallery. The fascinating history of art glass in this Period begins in the 1880's with the precursors to Art Nouveau, follows the creations of Galle, Daum and Muller Freres. It continues with the development of opalescent, frosted and clear molded glass -- especially Lalique, Art Deco, functionalism, Orrefors and English and Scottish glass. But it is above all the glass itself, beautifully reproduced in full color, that brings to life one of the most exciting and creative periods in the history of art glass.

**Ibuprofen** - Kim D. Rainsford 2003-09-02

Ibuprofen is widely used throughout the world for a variety of conditions. This reference work provides a comprehensive and critical review of the basic science and clinical aspects of the drug. The book begins with the history and development of the drug and its current patterns of use world-wide before moving on to examine its basic pharmaceutical attributes and medicinal chemistry. The properties of various formulations are described (oral prescription and OTC, topical and others) are described. The pharmacokinetics of ibuprofen in animals and humans is discussed - highlighting the factors affecting absorption, distribution, metabolism and elimination. The clinical pharmacology and toxicology and the drug's mechanisms of action in different disease states and conditions are covered. The therapeutic uses in various acute and inflammatory conditions is detailed. Also considered are the safety versus efficacy issues and the pharmacoepidemiological data.

**Glass** - Victor Arwas 1987

**Exhaustion** - Anna K. Schaffner 2016-06-21

Today our fatigue feels chronic; our anxieties, amplified. Proliferating technologies command our attention. Many people complain of burnout, and economic instability and the threat of ecological catastrophe fill us with dread. We look to the past, imagining life to have once been simpler and slower, but extreme mental and physical stress is not a modern syndrome. Beginning in classical antiquity, this book demonstrates how exhaustion has always been with us and helps us evaluate more critically the narratives we tell ourselves about the phenomenon. Medical, cultural, literary, and biographical sources have cast exhaustion as a biochemical imbalance, a somatic ailment, a viral disease, and a spiritual failing. It has been linked to loss, the alignment of the planets, a perverse desire for death, and social and economic disruption. Pathologized, demonized,

sexualized, and even weaponized, exhaustion unites the mind with the body and society in such a way that we attach larger questions of agency, willpower, and well-being to its symptoms. Mapping these political, ideological, and creative currents across centuries of human development, Exhaustion finds in our struggle to overcome weariness a more significant effort to master ourselves.

Definition and Development of Human Rights and Popular Sovereignty in Europe - European Commission for Democracy through Law 2011-01-01

What role do the people play in defining and developing human rights? This volume explores the very topical issue of the lack of democratic legitimisation of national and international courts and the question of whether rendering the original process of defining human rights more democratic at the national and international level would improve the degree of protection they afford. The authors venture to raise the crucial question: When can a democratic society be considered to be mature enough so as to be trusted to provide its own definition of human rights obligations?

Textbook of Pediatric Gastroenterology, Hepatology and Nutrition - Stefano Guandalini 2015-09-30

This textbook provides a comprehensive and state-of-the-art overview of the major issues specific to the field of pediatric gastroenterology, hepatology, and nutrition. The first part of the book, Gastroenterology and Nutrition, presents in a systematic way the overall scope of issues encountered by children

(newborn to teenagers) suffering from disorders of the gastrointestinal tract, pancreas and/or presenting nutritional issues. These chapters are structured in logical sections to facilitate consultation and include major topics ranging from congenital disorders to gastrointestinal problems of the newborn, infectious diseases of the gastrointestinal tract, and approach to nutritional problems in the various pediatric ages. The second part of the book, Hepatology, is articulated in a series of chapters which present a comprehensive review of congenital and acquired disorders of the biliary tract and liver. This section also includes a critical analysis of available diagnostic and therapeutic procedures and future perspectives. Written by experts in the field, *Textbook of Pediatric Gastroenterology, Hepatology and Nutrition: A Comprehensive Guide to Practice* constitutes a much needed, innovative resource combining updated, reliable and comprehensive information with agile consultation for a streamlined approach to the care of children with such disorders.

*Ketogenic Diet and Metabolic Therapies* - Susan A. Masino 2016-11-17

Ketogenic diets have been used to successfully treat epilepsy and stop seizures for nearly a century. When more traditional therapies, such as pharmacology, reach their limitations for treatment, the metabolic approach surpasses, targeting the overall physiology and homeostatic functions of the patient. *Ketogenic Diet and Metabolic Therapies* is the first comprehensive scientific resource on the ketogenic diet, covering the latest research including the biomedical mechanisms, established and emerging applications, metabolic alternatives, and implications for health and disease. Experts in clinical and basic research share their research into mechanisms spanning from ion channels to epigenetics, their insights based on decades of experience with the ketogenic diet in

epilepsy, and their evidence for emerging applications ranging from autism to Alzheimer's disease to brain cancer. Research in metabolic therapies has spread into laboratories and clinics of every discipline, and is yielding to entirely new classes of drugs and treatment regimens. The book's editor, Susan A. Masino, brings her unique expertise in clinical and research neurology to the overall scope of this work. To further enhance the scope and quality of this one of a kind book, section editors Eric Kossoff, Jong Rho, Detlev Boison, and Dominic P. D'Agostino lend their oversight on their

respective sections.
